

Google Classroom/Email

7th Grade English students will access assignments through google classroom and using their wtsd emails. I will publish updates and question forums on google classroom so that students know what is expected of them. Students also know their logins for commonlit and edgenuity but may email me if there is a problem logging in and I can reset their passwords remotely.

Commonlit Assignments

The majority of student assignments will be on [commonlit.org](https://www.commonlit.org) where students already have accounts and familiarity with the program. Students will be assigned three informational texts. Students will be required to annotate and summarize each paragraph of the text, answer guided reading questions, and then take the multiple choice and written assessment that is similar to the state test format.

Emphasis will be placed on informational texts in order to prepare for the state test. On certain days a literary text may also be assigned as a paired text for students to practice with. I will monitor student progress, provide feedback and release grades for pending assignments, and assign additional assignments to provide enrichment for individual students who complete the assignments quickly.

Edgenuity

Students will also have weekly assignments and learning goals on the Edgenuity program. All 7th graders are already enrolled and in the process of completing a 7th grade MS-aligned online course for English that includes informational and literary texts, grammar, vocabulary and a variety of readings and projects.

To ensure student accountability, students will be required to complete a standard level of progress on edgenuity, about 10%, and input a standard number of hours, about 3 this week. Therefore students will be held accountable for their progress at home even though the program is individually paced and students will be completing different assignments at different times. I will monitor student progress on edgenuity this week and use the dashboard feature to email individual students who are behind on their progress goals and logged hours.

MasteryConnect

Students will have a short passage quiz on masteryconnect this friday where they will be given the code for the test on google classroom and will have 24 hours to complete it. I will then reset the code for individual students who may not have access to a computer during this testing window.
